THE WORLD'S FINEST CUTTING MACHINES

## CUTTER BARS

### JAVELIN

The Javelin range of precision wide-format cutter bars is designed to exceed the most demanding standards of accuracy. The unique design of the Javelin allows Keencut technicians to factory adjust for straightness, using laser technology, to within 0.2mm over the 3.1 metre length of the cutter bar (1:15000), a guarantee only available from Keencut. The accuracy of the Javelin makes it ideal for cutting banner materials, pop-ups and other display materials that require precise and accurate cutting for perfect alignment.

The Javelin is equipped with lift stands to support the unit between cuts and enable easy placement of work. The Javelin is designed for use as a portable unit or located on an existing work table using the Keencut optional surface mounted Lift & Hold system. Combined with the Keencut Big Bench the Javelin creates a complete cutting table and workstation in any workshop

### PRACTIK & MAX

The innovative design of the Keencut PRACTIK offers exact accuracy for general purpose cutting of wide format materials up to 3.1 metres in width. The Praktik carries a straightness guarantee of 1.00mm or 1:3000 over the entire length and is an economical alternative to the Javelin when less extreme accuracy is required. The Praktik is ideal for cutting PVC foamboard, vinyl, woven fabrics, foam centred board, honeycomb and corrugated plastics, film, paper, tissue and many more flexible and rigid materials. All Keencut cutter bars use utility knife blades and feature a blade depth adjustment and a spring-loaded blade ejector as standard. The utility blades will cut to a depth of 10mm (0.4") and Keencut XR blades cut to a depth of 13mm (.5"). The patented linear bearings have been tested under load for 1600km (1000 miles) and carry a 20 year guarantee. Full length silicon rubber grip strips ensure all work is clamped when cutting and also protect the surface of the material being cut.

If the requirement is for super-wide format cutting then the unique and rigid profile of the Keencut MAX will ensure accurate cutting of materials up to 5 metres in width. Available in four sizes from 3.5 metres the unique Keencut MAX offers the only precise way to cut large format display materials and is guaranteed straight to 2.0mm (1:2500) over its full length.

- ✓ Rear loading blade holder for swift replacement; blades will not pull out in heavy material
- ✓ Standard twist lifts provide a simple and convenient lift and hold solution
- ✓ Quick fit thread cap for easy accessory attachment (Textile Cutter)
- ✓ Rotating knob for ultra-fine blade depth adjustment
- ✓ Two full length silicone grip cords protect and clamp your materials
- ✓ Unique extrusion designs for unparalleled and guaranteed accuracy
- ✓ Visit [WWW.KEENCUT.CO.UK](http://WWW.KEENCUT.CO.UK) for more features
- ✓ All Keencut products are 100% Manufactured by Keencut technicians in Corby, England. 99.998% of source materials are made in the UK and EU
- ✓ 5 year guarantee

### CUT UP TO 13MM

PVC Foamboard, Pop-up Banners, Foam-Centred Board, Corrugated Plastics, Fabric & Textiles, Acrylic, Banner, And much more...

### MAX SIZES

3.5M - 140"  
4.0M - 160"  
4.5M - 180"  
5.0M - 200"

### JAVELIN & PRACTIK SIZES

1.1M - 44"  
1.6M - 64"  
2.1M - 84"  
2.6M - 104"  
3.1M - 124"

THE WORLD'S FINEST CUTTING MACHINES

## CUTTER BARS

### SABRE

Efficiently engineered for one off or volume production, the Keencut SABRE offers the same exact cutting capabilities as the Keencut PRACTIK and is constructed on an anodised aluminium baseboard. The SABRE is designed for use on a bench or attached to the optional stand. Using the lockable castors (included) Sabre can be moved and positioned alongside any wide-format printer. Also available with optional waste catcher and roll feed the Sabre is a versatile cutter with no equal.

A recess integral to the base protects the blade tip during cutting and a cutting mat can be added when cutting textiles. Full length silicon rubber grip strips in the SABRE base and underside of the cutter bar clamp materials while cutting and provide protection to even the most sensitive surfaces. The self adjusting hinges give lay-flat cutting on all materials up to 13mm (0.5") in thickness.

### BIG BENCH

Constructed of strong anodised aluminium extrusions the Keencut BIG BENCH creates a solid and precise cutting table and work station. With concealed corner fixings, built in cutting base plate and subsurface integral Lift & Hold system the Big bench is a stylish and practical addition to every workshop where precise cutting is essential.

Offered in lengths to accept all sizes of Keencut Javelin, Practik or Max Cutter bars the Big Bench is available in three standard widths and can be simply extended or reduced to meet changing demands.

Special order sizes and additional shelf fittings are available as an option. Big Bench is simple to assemble and the unique assembly system is rigid and robust. A base plate levelling system provides extreme flatness, consistent clamping and cutting accuracy. Big Bench and matching Keencut Proteus modular units provide unlimited fixture applications for any workshop.

### TEXTILE CUTTER

Using a razor-sharp ultra-thin circular blade the new Textile cutter will transform every Keencut Javelin, Practik, Max or Sabre into a machine that will cut the finest of flag, textiles and paper. Offering super straight cutting up to 5 metres long without fraying or rippling, the Textile Cutter provides a safe, sure way of cutting thin, high tensile and delicate materials that cannot be cut by conventional methods.

- ✓ Rear loading blade holder for swift replacement; blades will not pull out in heavy material
- ✓ Integral baseplate with metric parallel indents and cut groove
- ✓ Quick fit thread cap for easy accessory attachment (Textile Cutter)
- ✓ Rotating knob for ultra-fine blade depth adjustment
- ✓ Two full length silicone grip cords protect and clamp your materials
- ✓ Unique extrusion designs for unparalleled and guaranteed accuracy
- ✓ Visit [WWW.KEENCUT.CO.UK](http://WWW.KEENCUT.CO.UK) for more features
- ✓ All Keencut products are 100% Manufactured by Keencut technicians in Corby, England. 99.998% of source materials are made in the UK and EU
- ✓ 5 year guarantee

### BIG BENCH SIZES

1.1M - 44"  
1.6M - 64"  
2.1M - 84"  
2.6M - 104"  
3.1M - 124"  
3.5M - 140"  
4.0M - 160"  
4.5M - 180"  
5.0M - 200"

### SABRE SIZES

1.0M - 40"  
1.5M - 60"  
2.0M - 80"  
2.5M - 100"  
3.0M - 120"
